Design

Improvement is the key to providing better solution to customers. That is why we pledge unwavering commitment to R&D and are always in search of technological innovations. Our conveyors are the result of a perfect combination between expertise in manufacturing and wealth of experience in engineering.

With our strong team of designers pooling their knowledge together, we are never short of ideas and solutions to meet the needs of our customers.

Our forte always lies in the flexibility of our modular designs. This enables our engineers to propose the most efficient and rational engineering solution according to your products and your specific logistic needs.

With our in-house design capability and in-depth knowledge on the subject, **MAKS** has never stop short of offering the best solutions to our customers. We design and build our machines to suit your production needs and each machine is tailored to work perfectly with your product.

We make machines, YOU make us special.
